Dear Animal Advocate,

As part of your Valentine's Day celebrations, please ask restaurants to have a heart! Frightened ducks and geese languish in filthy wire pens, force-fed vast quantities of nutritionally-incomplete gruel for weeks with cold metal pipes until their livers swell up to ten times their normal size. Barely able to walk or breathe, the birds are slaughtered and their diseased, fatty livers are sold as foie gras - a supposed delicacy.

This Valentine's Day, a simple action on your part will make a strong statement.

Please help us bring an end to this intolerable cruelty by telling restaurants that serve foie gras to have a heart. Ducks and geese commonly suffer and die from lacerated tracheas and esophagi, impaction of undigested food, and suffocation from the regurgitated corn mixture. Numerous maladies are left untreated since veterinary care is not profitable. Foie gras production is so cruel it has been banned in a dozen European countries and California. Many other states are considering outlawing foie gras, as well.

Respectable restaurants do not need to serve foie gras. Not only cruel to birds, this process ironically force-feeds an animal to the point of fatality to produce a luxury item - while children and adults go hungry in this country.

Visit our website, www.nofoiigras.org, for more information and to get materials. You can also call us at 607-583-2225 ext. 251 or email us at campaign@farmsanctuary.org. Please let us know if you need more Valentines to deliver and tell us where you delivered them to.

Please tear off this Valentine and deliver to any restaurant serving foie gras.
